## 12. Initialization of LCM

The LCM automatically initializes ( reset ) when power is turned on using the internal reset circuit. If the power supply conditions for correctly operating of the internal reset circuit are not met, initialization by instruction is required. Use the procedure is next page for initialization.

### Internal Power Supply reset

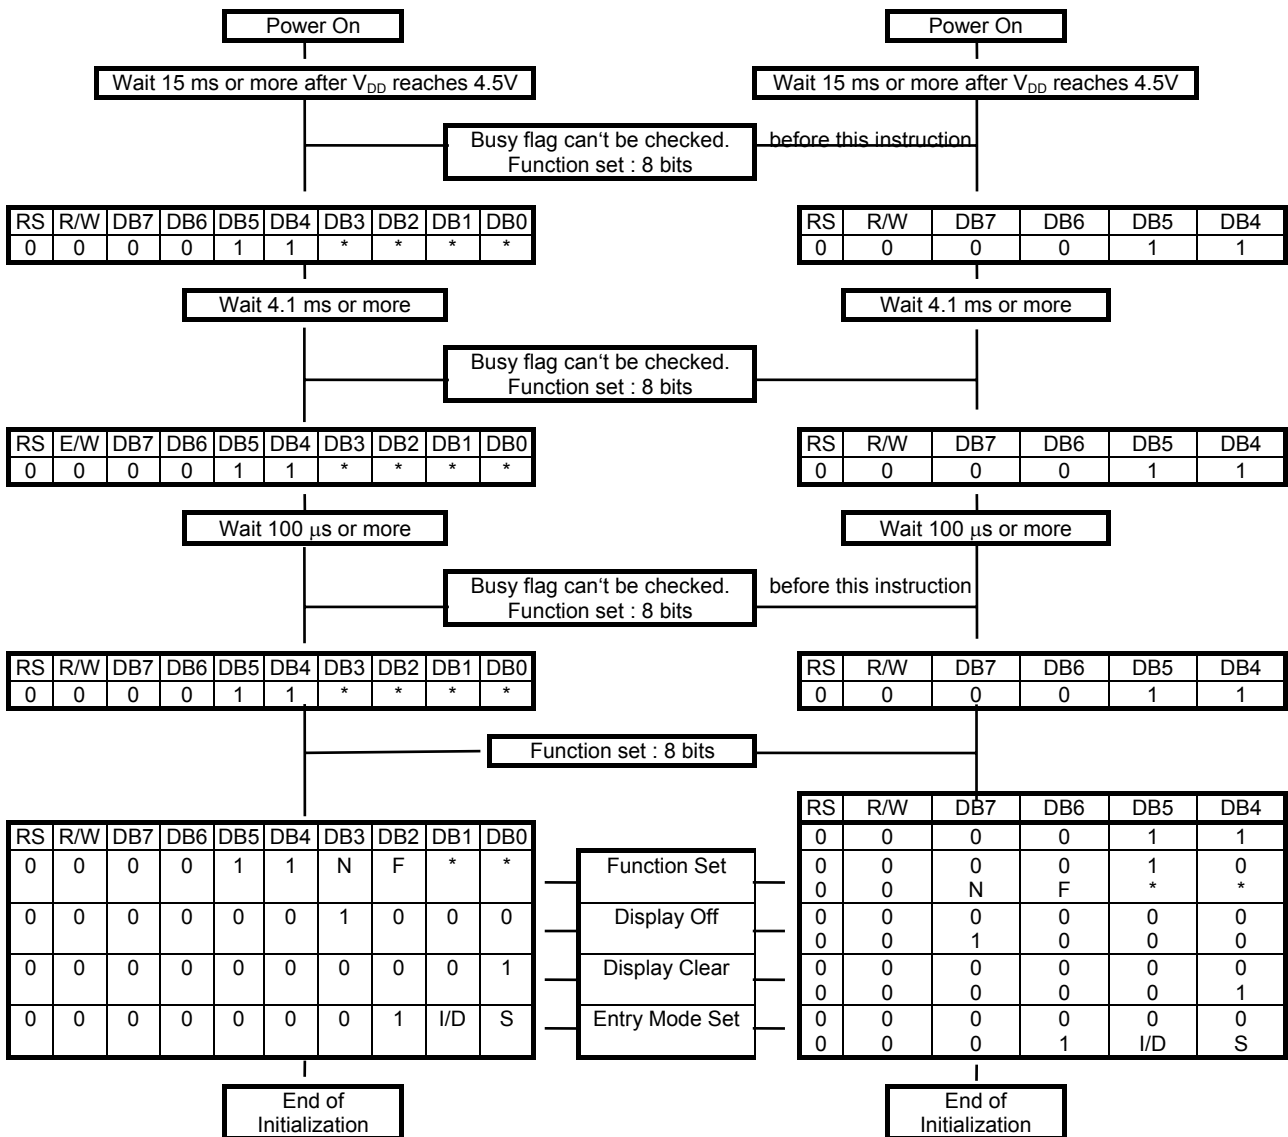

(Note 1)  $10\text{ ms} \geq tr_{cc} \geq 0.1\text{ ms}$ ,  $to_{ff} \geq 1\text{ ms}$ .

(Note 2)  $to_{ff}$  stipulates the time of power OFF for momentary power supply dip or when power supply cycles ON and OFF.

Item	Symbol	Test condition	Limit (Min.)	Limit (Max.)	Unit
Power supply rise time	$tr_{cc}$	--	0.1	10	ms

#### 1) 8 Bit Interface

#### 2) 4 Bit Interface

- Busy flag is checked after instructions are completed. If busy flag isn't checked, the waiting time between instructions should be longer than execution time of these instructions.

## 17. Functional Test & Inspection Criteria

### 17.1 Sample plan

Sample plan according to MIL-STD-105D level 2, and acceptance/rejection criteria is.

Base on : Major defect : AQL 0.65 Minor defect : AQL 2.5

### 17.2 Inspection condition

Viewing distance for cosmetic inspection is 30cm with bare eyes, and under an environment of 800 lus (20W) light intensity. All direction for inspecting the sample should be within 45° against perpendicular line.

### 17.3 Definition of Inspection Zone in LCD

Zone A : Character / Digit area

Zone B : Viewing area except Zone A ( Zone A + Zone B = minimum Viewing area )

Zone C : Outside viewing area ( invisible area after assembly in customer's product )

Note : As a general rule, visual defects in Zone C are permissible, when it is no trouble for quality and assembly of customer's product.

### 17.4 Major Defect

All functional defects such as open ( or missing segment ), short, contrast differential, excess power consumption, smearing, leakage, etc. and overall outline dimension beyond the drawing. Are classified as major defects.

17.5 Minor Defect

Except the Major defects above, all cosmetic defects are classified as minor defects.
